CAST WEAR PARTS

FOR METAL SHREDDERS

Since its establishment in 1961, Falvey Steel Castings has been unwavering in its commitment to customer service. Our focus on understanding and meeting our customers' needs, combined with our ability to provide the highest quality castings at a competitive price, has positioned Falvey as a global leader in the wear parts industry. Our unique blend of metallurgy and stringent quality control policy allows us to supply wear replacement parts with confidence, ensuring a perfect fit for our customers. We stand behind every part we sell, guaranteeing their quality and fit.

Hammers & pin protectors in manganese, DHT, & alloy steels

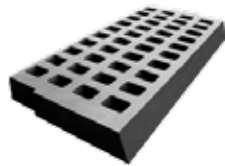

Grate designs in single & double beam with in-line & offset hole patterns.

Kickout & reject doors for all model shredders.

Feedroll

Back wall & top grates

Quality rotor caps in alloy & manganese steel

Roof & upper mill castings

Intake breaker bars & anvils

End stubs

Side wall liners

To further enhance our catalog of shredder wear castings, Falvey Steel Castings has acquired the engineering, pattern, and technical assets of the former **Columbia Steel Casting Company**. Building upon this product development and metallurgical research allows Falvey Steel to provide the scrap metal shredder industry with enhanced designs and a high standard of quality.

What makes Falvey Steel different?

Quality Control

The foundries we represent undergo qualification to ensure they meet our product quality standards

Inventory

We maintain a stock warehouse of high-demand wear parts and support pieces to meet the needs of our supported industries

Engineering

Our staff of mechanical engineers have the qualifications and state-of-the-art tools to design parts or customize parts to meet any application.

Servicing Our Customers Is Our Biggest Asset

3D Laser Profile

Custom cavity profiles measured using state of the art 3d Laser Scanning technology.

Laser scanning pinpoints angles and dimensions more accurately and in a fraction of the time of traditional hand measurements.

Logistics

Designated logistic team to support and ensure on-time deliveries at economical freight prices.

- Experienced staff to support LTL deliveries and container loads.
- Warehouses are strategically positioned nationwide to allow quick and effective delivery.
- Stocking programs offered to keep your most needed parts readily available.

Sales Team

Experienced sales staff knows your machine and your application.

- Experienced sales staff with years of experience servicing the metal shredder industry.
- We offer consultation of your wear parts to ensure your design offers the best productivity and utilization of metal
